

STATE OF WASHINGTON  
DEPARTMENT OF HEALTH  
PO Box 47852 \* Olympia, Washington 98504-7852

**Job Opportunity**

The Department of Health, Construction Review Services (CRS), is seeking two qualified individuals to review and evaluate building designs, specifications, functional programs and working drawings for conformance to applicable rules, regulations, and code requirements as they pertain to health and residential care facilities. Reviews will also, include special fire-related systems such as fire alarm, automatic sprinkler, chemical fire extinguishing, and range hood sprinkler systems.

The positions will identify areas of non-compliance to building/fire codes and regulations and will work closely with local, State and Federal healthcare officials, architects, and contractors. The position will also research codes and industry standards, keeping current with technical changes and information in building design and life safety systems.

The candidates may perform site inspections across the state for conformance to the codes and regulations.

**Successful candidates will have:**

Knowledge of: Uniform Fire Code, the National Fire Protection Association Codes and Standards, the Uniform Building Code, as well as other fire, building, electrical, and mechanical codes applicable to the duties of the position. The candidate should have a fundamental working knowledge of fire protection engineering.

Ability to: read and understand blueprints, ordinances, specifications and construction plans, and identify areas of non-compliance with fire and life safety codes; identify deficiencies and specify corrections for inadequate building, structural, mechanical, electrical and other systems design; maintain accurate records and written reports; and deal effectively with other staff, owners, architects, engineers, contractors and the general public.

**Desirable Qualifications:**

Four years of building plan review experience. Professional experience in application of the above codes, standards, and health and residential facilities rules and regulations as they pertain to facility design and construction, or

Certified fire protection engineer, or

College level education in fire prevention engineering, code administration, structural engineering, architecture, or allied field will be substituted, year-for-year, for experience.

Individuals interested in the position should send a resume and letter of interest to:
